Project Name: Traffictelligence: Advanced Traffic Volume Estimation with Machine

Maximum Marks: 2 Marks

Customer Problem Statement Template

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)

I am (Customer)

I'm trying to

But

Because

Which makes me feel

PS-1

I am a city commuter.

I'm trying to reach my destination on time.

But I often get stuck in unpredictable traffic congestion.

Because there is no efficient real-time traffic volume prediction system.

Which makes me feel frustrated and anxious about delays.

PS-2

I am a traffic management official.

I'm trying to plan road usage and infrastructure improvements.

But I lack accurate traffic data and forecasting tools.

Because the current systems do not support advanced predictive analytics.

Which makes me feel underprepared and reactive rather than proactive.
