

Project Design Phase-II
Data Flow Diagram & User Stories

Date: 31 January 2025
Team ID: LTVIP2025TMID35065
Project Name: Trafficelligence – Intelligent Traffic Volume Prediction System
Maximum Marks: 4 Marks

Data Flow Diagram

Entities:

- User (Mobile/Web)
- Admin
- Dataset Source (Traffic APIs or CSV Upload)

Processes:

1. User Registration/Login
2. Data Input & Processing
3. Model Prediction Engine
4. Visualization & Dashboard Display

Data Stores:

- User Database
- Traffic Dataset Store
- Prediction Logs

Data Flow:

- Users input registration/login → sent to User Database
 - Admin uploads data → processed and stored in Dataset Store
 - Prediction Engine processes cleaned data → generates results
 - Visual outputs sent to Dashboard for user/admin
-

User Stories Table

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Customer (Mobile)	Registration	USN-1	As a user, I can register for the	I can access my account/dashboard	High	Sprint-1

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Customer (Web)	Login		application by entering my email, password, and confirming my password.			
		USN-2	As a user, I will receive confirmation email once I have registered.	I can receive a confirmation email and click confirm	High	Sprint-1
		USN-3	As a user, I can register through Facebook.	I can access dashboard with Facebook login	Low	Sprint-2
		USN-4	As a user, I can register through Gmail.	I can sign up using my Gmail credentials	Medium	Sprint-1
		USN-5	As a user, I can log in using my email and password.	I am redirected to my dashboard on successful login	High	Sprint-1
	Dashboard	USN-6	As a user, I can view real-time traffic predictions.	I can see graphical representations of traffic volume	High	Sprint-2
	Dashboard	USN-7	As a user, I can filter predictions by time/location.	Filters work and update the chart in real-time	Medium	Sprint-3
	Dashboard	USN-8	As a web user, I can upload CSV traffic data files.	The uploaded file is validated and saved	High	Sprint-1
	Dashboard	USN-9	As a web user, I can view a history of predictions made.	I can view previous results in a tabular format	Medium	Sprint-3
	Ticket Management	USN-10	As a care executive, I can manage user queries regarding prediction output.	I can see and resolve support tickets	Medium	Sprint-3

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Administrator	User Management	USN-11	As an admin, I can add or remove users.	Users can be added or deleted from the system	High	Sprint-2
	Dataset Management	USN-12	As an admin, I can upload new traffic datasets.	Uploaded data is stored and shown in system	High	Sprint-1
	Model Monitoring	USN-13	As an admin, I can view model performance statistics.	Accuracy metrics are shown in the dashboard	Medium	Sprint-3
